

Supported Payroll Providers

360°

Retirement data flows in both directions between your payroll provider and PCS Retirement. All aspects of payroll contribution processing and maintenance are automated. Changes to withholdings, such as automatic enrollments, employees' deferral rate elections, and plan loans, are sent directly to your payroll provider.

180°

Your payroll provider transmits data each pay period to PCS Retirement, enabling us to keep accurate records and process retirement contributions. While this data stream is automated, it is one-way. You retain responsibility for monitoring changes to withholdings, such as automatic enrollments or employee-initiated elections and plan loans.
